

Who are b2b Eco Lighting?

Bb2 Eco Lighting is a wholesale distributor who bridges the gap between factory and wholesale customer. We supply quality light fittings for the retro market, specialising in Long life T5, Long life T8 and High pressure sodium lamps. We also supply ballasts and luminaires.

b2b Eco Lighting stocks and supplies long life and Eco light bulbs, sourcing product from a small number of carefully chosen factories. We supply from stock in order to minimise lead times from order to delivery. Priority customers can anticipate a 24 hour order cycle from PO to delivery.

Our suppliers must be ISO14001 certified, and must meet our rigorous standards for longevity, quality and value. While we will never supply cheap products, you will find our pricing is very competitive and excellent value for money. We offer warranties.

Our chosen suppliers

Our main supplier of choice is Aura Lighting. Established since 1930, Aura launched their first Long Life lamp in 1980 and they came to revolutionise the approach to fluorescent lighting. With over 700 products Aura has the most extensive range of Long Life light sources in the market. Recently they launched a new range of eco lighting solutions that helps you to reduce your energy consumption by up to 60%. Aura ECO SAVER lamps lower energy consumption and maintenance costs, without any additional installation costs as the lamps can be installed in your existing fixtures.

Our services

Product selection

Choosing the correct product is not easy. Customers will face choices from a range of 700 products. We work with our customers to understand the environment of their lighting needs, considering location, temperature, ease of access and other factors before making recommendations.

Warehouse

We stock product and supply from stock. We do this for two reasons.

1. To be able to supply our customers as fast as next day delivery.
2. To test products using our installed test facilities.

Delivery

We understand that customers operate to tight deadlines. While standard delivery is normally 48 hours from order, we can deliver next day when required.

Support

We see our customers as long term partners. We will work with you to ensure that you choose the right product for your requirements. We can offer trial quantities to allow the customer to trial the product.

Our products are guaranteed, so you can purchase with confidence in knowing that your lamps will deliver to their design specifications.

The Environment

All Aura Long Life lights are CO2 neutral through our cooperation with the environmental organization Climate Care. Read more at www.climatecare.org. Aura Long Life lamps are marked with a symbol for Long Life which shows how many times the product lasts longer compared to standard light sources. All Aura Long Life products meet the requirements of the RoHS and the WEEE directives.
